GLOBAL ENVIRONMENTAL POLICY

We recognize the importance of a consistent, effective, and transparent communication model in achieving our global objectives. Therefore, we have established a comprehensive Global Environmental Policy to ensure open, transparent, and trustworthy communication with all our stakeholders.

1. PURPOSE

Through this Policy, we define our approach and guiding principles for protecting and enhancing the environment within our strategies, operations, investments, and business processes as part of our sustainability objectives.

With this Policy, we aim to establish and effectively implement an environmental management system aligned with the United Nations Sustainable Development Goals (SDGs), the United Nations Global Compact, and ESG (Environmental, Social, and Governance) principles.

2. SCOPE

This Policy applies to all managers and employees in every country where our company operates.

3. CORE PRINCIPLES

- We regard the protection of nature and the environment as an integral and essential component of our mission to provide reliable, sustainable, and value-added energy solutions.
- We consider sustainability, including environmental enhancement, to be a key driver in achieving our vision.
- We establish and effectively implement an environmental management system aligned with the United Nations Sustainable Development Goals, the United Nations Global Compact, ESG principles, applicable national and international environmental regulations, standards, and best practices.

- To contribute to sustainable development goals, support the global energy transition, prioritize the fight against climate change, and achieve our carbon neutrality targets, we invest in and develop solutions related to clean energy, energy efficiency, innovative energy technologies, and smart grids.
- We respect people and the environment. Leaving a clean and healthy environment for future generations is one of our fundamental priorities.
- We adopt a proactive approach to environmental protection and make environmental awareness an integral part of our corporate culture.
- We ensure the efficient use of natural resources throughout all our processes.
- Through business models and practices that respect nature, biodiversity, and historical and cultural heritage, we respond to stakeholder expectations regarding environmental protection and promote transparency.
- In all locations where we operate, we protect habitats and all species—particularly endangered and endemic species—and sustainably manage our impacts on biodiversity.
- We embrace the principles of prevention and continuous improvement in environmental management.
- We integrate environmental protection and enhancement principles into all our activities and processes.
- We regularly assess the environmental impacts of our operations.
- To manage the environmental impacts of our activities, we apply a mitigation hierarchy consisting of avoiding environmental harm, minimizing impacts, restoring damage, and/or providing compensation where necessary.
- We expect our business partners and other stakeholders to respect and contribute to environmental protection and support efforts to raise environmental awareness.
- We expect our suppliers to establish environmental management systems in compliance with national and international regulations, continuously improve their environmental performance in line with sustainable development and circular economy principles, and commit to environmental protection.

- To achieve our carbon neutrality targets, we monitor greenhouse gas emissions across the lifecycle of our products, services, and investments, calculate our carbon footprint, and implement reduction measures.
- To ensure the sustainable use of natural resources, we promote the efficient and sustainable use of water in our operations, manage water scarcity risks, and support the return of used water to the environment in an appropriate manner.
- To support environmental sustainability, we establish waste management systems and processes in full compliance with national and international regulations.
- We minimize waste generation and promote recycling. In line with the Zero Waste principle, we ensure the recycling of recyclable materials and minimize the environmental impact of waste.
- We implement regular training programs to inform our employees about environmental awareness and foster a culture of environmental responsibility.
- In line with our commitment to transparency, we periodically report on the performance and progress of our environmental protection and enhancement policies, approaches, and practices.
